Release Letter

Product:	***Bosch Object Search for Genetec***
Version:	***1.1.7***

This letter contains latest information about the above mentioned software.

1. General
The Bosch Object Search enables Operators in Genetec Security Centers Security Desk client to search for Objects which are detected by Bosch Camera Analytic.

2. Features
The plugin provides following Searchable objects

- Person   Including object speed
- Truck   Including object speed
- Bus   Including object speed
- Car   Including object speed
- Motor Bike   Including object speed   (CPP13/14 , with CPP 6/7/7.3 reported as bike)
- Bicycle   Including object speed   (CPP13/14 , with CPP 6/7/7.3 reported as bike)

3. Important Notes
To generate metadata the cameras need to be calibrated, it is recemented to use latest version of Bosch Configuration manager https://downloadstore.boschsecurity.com/

5. Requirements

- Genetec Security Center: SC 5.10.x and SC 5.11.x
- Bosch FW 6.32 or higher
- Bosch camera with enabled Analytics (CPP-6/7/7.3/13/14)
- Workstation as defined by Genetec

6. Change log

With version 1.0.9:
GP-1: Publisher, size and version are now listed in the package properties.
GP-2: The plugin can now be used by a non-administrator user in Security Center
GP-3: The logs namespace is defined and easily identifiable in the logs console.
GP-4: UX improvement of listing the results

With version 1.1.5:
GP-11: User selection of cameras per Archiver
GP-12: Adapt changes in meta-data recording text on regionalisation

With version 1.1.7:
GP-13: Cameras available in the system is queried from the client plugin running in Security desk. The user selected camera list is then synced to the server plugin running under distributed Archivers
